## DETAILED ACTION

### ***Status of Claims***

1. Applicant's reply, filed 10/29/2008, has been received and entered.

No claims have been amended.

Claims 1-14, 17 and 18 have been cancelled.

No new claims have been added.

Thus, claims 15 and 16 remain currently pending in this application.

### ***Allowable Subject Matter***

2. The indicated allowability of claims 15-16 is withdrawn in view of the newly discovered reference(s) to Polla (US 5,536,963). Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by **Polla** (US 5,536,963).

With respect to claim 15, Polla discloses an infrared detector **50** (Figure 3) comprising: a thermal resistor **20** composed of a metal oxide having a perovskite

Art Unit: 2884

structure (col. 5, lines 39-41; col. 6, lines 11-39), an electric field **18,16** applying unit operable to apply an electric field to the thermal resistor **20**, the electric field applying unit **18,16** and the thermal resistor **20** sandwiching an insulator **46** (abstract; col. 4, line 65 – col. 5, line 3); and a detecting unit (voltmeter) operable to, in a state where the electric field is being applied to the thermal resistor **20** by the electric field applying unit **18,16**, detect an amount of received infrared light using the thermal resistor **20** (col. lines 35-63).

With respect to claim 16, Polla discloses a changing unit **52** operable to cause the electric field applying unit **18,16** to change an intensity of the electric field (col. 5, lines 49-63).
